

**pc1is055 ~ Parlor Games and Paper Dolls
(1" dollhouse scale 1:12)**

Required tools and supplies:

- X-acto knife and fresh blade
- A thin metal straight-edge ruler. Make fold lines by pressing against edge of the ruler.
- Tweezers, detailing scissors
- Good cutting mat
- Fast-grab, quick-dry white craft glue that dries clear
- Small piece of aluminum foil to use as a glue pot
- Slender artist's paint brush to apply glue
- Optional: Paper Effects clear dimensional paint for dominos and checkers pieces
- Optional: 1/8" paper punch for checkers pieces
- Optional: Thick squeeze paint for fabric to make Parcheesi game pieces
- Optional: Scotch 1/2" wide double-sided tape
- Optional: Self-dry modeling clay for filling game dice

Products in tutorial may look different from yours, but constructed identically to yours. You can print these tutorial pages. However, leaving the tutorial on your screen allows you to zoom in closely on the photos.

1. Apply clear Paper Effects or other dimensional paint to checkers pieces. Set aside to let dry thoroughly. It is alright to go outside the checkers' boundaries.

2. Cut game boards and fold in half. Use the back of finger nail to burnish folds. Then glue back to front. Repeatedly smooth and turn over boards to make sure they dry flat.

3. Use the 1/8" paper punch to cut checkers pieces. Remove the paper punch's catch so you can see what you are punching.

4. Here is a photo of the placement of checkers pieces. Used here to glue down pieces is Paper Effects.

5. Take the dominos faux box bottom and streak with Paper Effects to give faux dominos some realistic dimension. Also Paper Effect the dominos included in the kit you will be cutting into little dominos. Let dry completely.

6. This photos shows the dry dominos. The first set has been folded back-to-back. What you see here is the back of the dominos with one line folded and glued. Used here was the 2-sided tape instead of glue. Cut this set from rest of dominos.

7. Snip dominos apart.

8. Cut and glue corner tabs of domino box bottom. Used here--instead of glue--is 2-sided tape.

9. Adhere two corner tabs found on domino box top. Position box top and bottom as shown here.

10. Glue box top's long panel to back of box bottom. Two-sided tape can be substituted for glue.

11. Place faux domino box interior with 4-side panels folded downward.

12. Put cut 2-sided dominos in box.

13. Cut and fold dice piece as shown. Then take a small amount of self-dry clay and place in center cross-point of paper piece.

14. Push paper against clay. Remove or add clay as needed. Once you have arrived at the right size and shape, set clay aside to dry. Once dry, paint glue on inside of paper dice, press sides against clay cube, hold until it sticks to its shape.

15. Cut four panels of playing cards. Fold each down the center lengthwise. Then glue blank sides together.

16. Make box top and bottom. Cut thoroughly dried card apart. Snip card corners if you are able to (too small for me). All 52 cards will not fit in box.

17. Use a piece of aluminum foil to practice making Parcheesi pieces. Take thick fabric paint and squeeze paint on foil in shape of chocolate drop. It takes some practice and the thicker the paint the better. Let dry, peel from foil and glue to Parcheesi board.

18. Glue the semi-gloss art panel onto the Parlor Games and Paper Dolls storage box before building the box.

19. Two-sided Scotch tape was used to make this box, but glue works just as well.

20. Adhere corner tabs. Fold and splay outward the lining panels as shown.

21. Adhere lining panels to the interior of the box.

22. Adhere the box interior panel to bottom as shown.

23. Adhere the longer panel to the interior of the lid and box back.

24. To fill the box: 1) paper doll panels, 2) game boards, 3) domino box in back, 4) playing cards box in front, 5) dice next to cards box, 6) fill empty spaces with leftover cards and checkers.
